# README WEEK1

Description:
My work consist of Beecrowd tasks. There is 9 classes in this project, each class named by task name, so you can easily find each task solution. Every class are located in «Tasks» folder which also located in «src» folder. Project name is «week1».

Downloads:
There is no downloaded libraries and programs needed.

Use:
User can just execute each class one by one, and check how each task works. Most of the tasks include necessary inputs, all inputs are tagged with text, so user can easily understand what each input responsible for.
